HISTORY OF THE GROUP OF COMPANIES

1999

In 1999, Partner Pak LLC was founded, specializing in the supply of high-quality fasteners of various profiles. The central warehouse and packaging production are located in St. Petersburg. Packaged fasteners "Partner Pak" is presented in the largest chain stores in Russia.

2001

EUROPARTNER was founded in 2001 as a production of nylon fasteners. Thanks to the concentration of knowledge and experience, the enterprise was able to achieve high production and economic indicators in the first years of operation. The company's strategy was aimed at further development, increasing its efficiency and expanding its assortment.

2011

In 2011, licensing relations with Sormat OY were completed. All products of the plant are manufactured under the brand name EUROPARTNER®. This step opened up new opportunities for the enterprise to expand the range of products and modernize the machine park.

2012

In 2012, the plant produced innovative products that replace metal analogues. New unique products are being developed in collaboration with BASF and DuPont.

HISTORY OF THE GROUP OF COMPANIES

2015

In 2015, on the basis of the EUROPARTNER plant, an instrumental production of high-quality technological tooling/molds was created. Through its European Partners - Ferrometal (Finland) and Scell It (France), Europartner exports fasteners to Finland and France.

2019

A website for direct sales of plant fasteners has been launched **www.europartner-online.ru**
New products released: universal nylon dowel PDU N, chemical anchor P10 sleeve, PDX dowel clamp. The machine park of the tool shop has been expanded. A new direction of the Europartner plant was developed - design, manufacture, service of molds for TPA. Quality control of polymer products and mold components reaches a new level with the help of a universal X-ray tomograph with the function of rengenotelevision Filin X-ARM CT Compact-450.

2021

New products have been released: PDU N universal nylon dowel, PRM reusable brace, PDF pipe fasteners, factory development - installer kit, expanded line of multi plug dowels. Quality control of polymer products and mold components reaches a new level using a universal X-ray tomograph. EUROPARTNER products are packaged in a new package multi box, first presented on the Russian market.

ISO 9001

"EUROPARTNER" plant management system
Certified for compliance with ISO 9001.

In 2020, the plant conducted an independent
technical audit by the American Audit Company.
The plant received the highest rating - 100%.

Engineering and production molds

The tool shop is equipped with the following machines:

- Vertical milling machining center **Haas CM-1**;
- Vertical milling machining center **Haas S Mini Mill 2**;
- Vertical milling machining center **Haas VF-2**;
- Vertical milling machining center **Haas VF-3**;
- NC Lathe **HAAS TL-1**;
- Horizontal milling machining center **QUASER MK60**;
- Electrical erosion copying and piercing machine **Mitsubishi EA12S**;
- Electrical erosion copying and piercing machine **Sodick AM3L LN2**;
- Face-grinding machine **Orsha**;
- Electric erosion wire cut-out machine **MITSUBISHI MV2400R**;
- NC Electrical erosion machine for starters openings **MITSUBISHI Start 43C**;
- Coordinate-measuring machine **Mitutoyo Crysta-Apex V7106**.

Engineering and production molds

Start-up and setup:

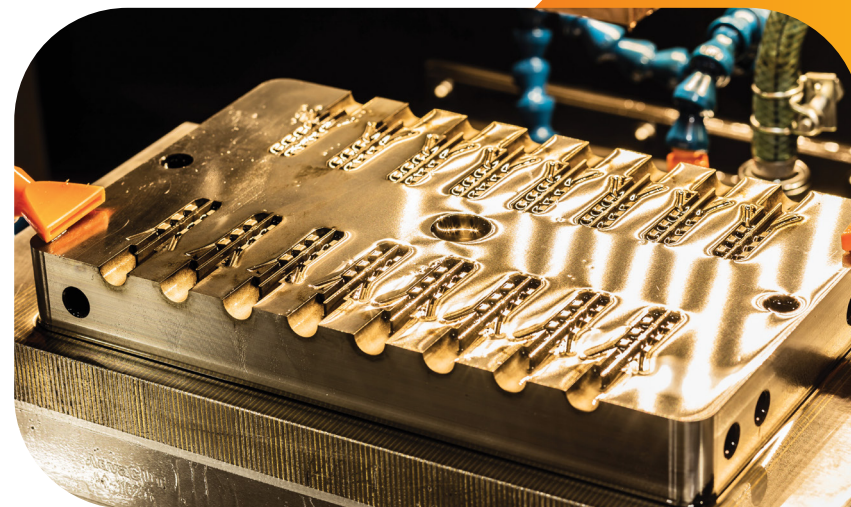

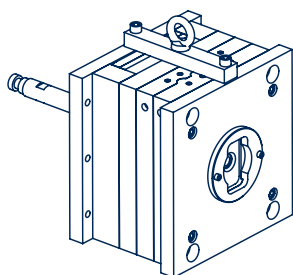

The mold is handed over only after receiving a reference sample of the molded article and releasing the test batch.

Гарантия:

1 year or 1,000,000 closures.
Up to 3 years during operation on our production.

Service:

Maintenance and repair molds throughout service life.

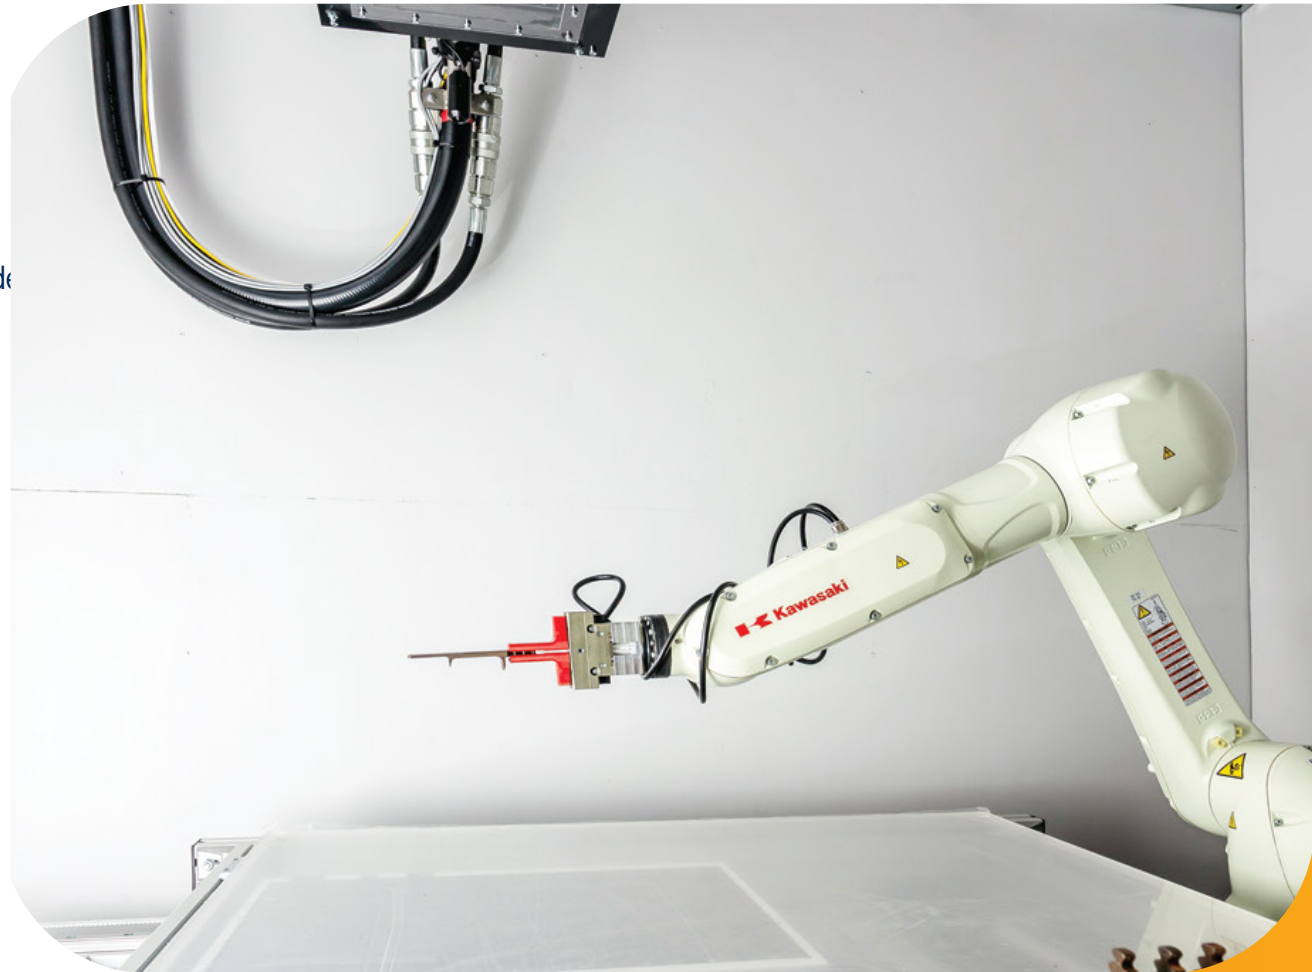

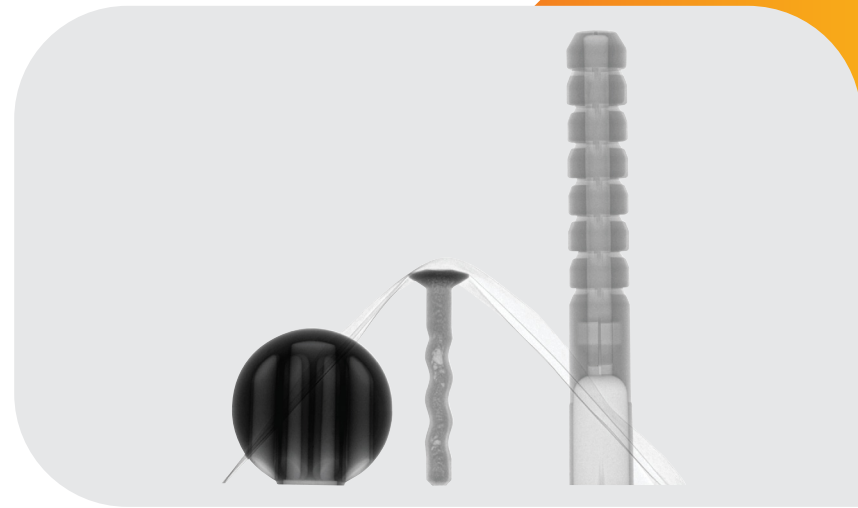

Quality Control

Modern solution quality control
polymer articles and component molds.

- detection of hidden defects/cavities/in polymer articles;
- determination of non-uniform density polymer articles;
- determination of internal defects in the geometry of polymer articles;
- detection of hidden defects/ cracks, cavities/mold components after quenching or machining - determination of hidden defects during mold repair;
- visualization of fasteners operation in different bases/concrete, brick, porous materials/.

Universal X-ray tomograph
with the function of rengenotelevision
Filin X-ARM CT Compact-450

Partnership

Our company maintains consistently high quality of products. All of our Partners are only suppliers proven by many years of cooperation, the world's largest leaders in the production of raw materials and equipment.

Materials and components

The company DuPont occupies a leading position in knowledge-intensive areas, in the production of materials with high operational characteristics, special-purpose chemicals.

BASF is one of the leaders in the global chemical industry. The group's portfolio of offers includes chemicals, plastics, special chemicals and agricultural products.

Ferrometal oy

FERROMETAL OY FINLAND - Product range is 20,000 items, including stainless and acid-resistant fasteners.

ENGEL Austria is the world's largest manufacturer of plastic injection molding equipment.

Haas Automation is the largest machine tool company in the United States, producing the entire range of vertical and horizontal processing centers with CNC, CNC lathes, turntable and turntable 5C.

Sodick Co., Ltd occupies the leading place in the world in terms of production and sales of high-tech electric spark (electric erosion) equipment with CNC systems.

Mitsubishi Electric Corporation (MELCO) is a global leader in electroerosion and laser processing.

The Japanese multinational corporation Mitutoyo specializes in measuring instruments and metrological technologies.

Packaging of the plant Europartner

Multibox

New packaging Europartner: Multibox fresh look at packing fasteners. The patented form of the package facilitates comfortable storage of products. The fasteners are easily removed without disturbing the integrity of the package, and the vandal-resistant latch prevents premature opening.

Advantages

- Vandal resistance;
- Strength (does not think, does not tear, does not break);
- Good visual presentation of the product;
- Convenience of reusable use;
- Accurate storage;
- Bit complete;
- Wide color scheme;
- Technical information on the product.

Fastener supply system industrial enterprises

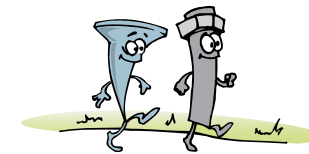

E-KANBAN - electronic system for control and optimization of production and supply processes, integrated into the customer accounting system.

The main principles of the system are:

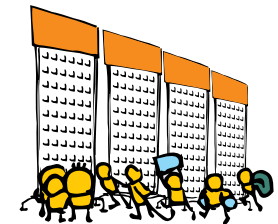

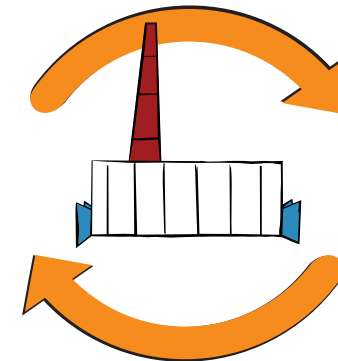

- delivery "Just in time," which involves delivery of the required material in clearly defined volumes and exactly at the time of commencement of work;
- reduction of the number of suppliers of components;
- maximum approximation of adjacent enterprises to the location of the head, as a rule, assembly plant.

The E-KANBAN system allows:

- Minimize indirect costs for purchase and logistics of components;
- reduce the storage area;
- Save wages.

Approval of the filling of the address storage system of ethyses at the place of their application.

E-Kanban Resupply on their own, without participation OMTS and warehouse employees.

E-Kanban creates warehouse address storage of metalsticks by "2 boxes" system.

The image shows a well-organized industrial supply system. It features several rows of orange metal shelving units. Each unit has multiple levels of blue plastic bins with orange handles. The bins are arranged in a grid pattern, with each bin containing small, uniform industrial parts. Above the shelving units, there are signs with the EOKANBAN logo and the text "СИСТЕМА СНАБЖЕНИЯ ПРЕДПРИЯТИЯ КРЕПЕЖНЫМИ ИЗДЕЛИЯМИ". In the center, there is a blue and white cart with a printer and a monitor. The background shows a large industrial facility with metal structures and overhead pipes.
